

EFFICIENCY AND QUALIFICATION FOR SOLAR PROJECTS

Consulting - Engineering - Implementation

WITH HUGE PASSION FOR THE ENERGY REVOLUTION

**Reliable, competent and with above-average yields.
From individual modules to complete solar parks**

Dipl.Ing.Yaşar Gürler CEO

ABOUT US

YG SOLAR ENGINEERING is one of the leading photovoltaic distributors in Germany and abroad. The owner-managed and self-financed company offers a wide range of products for PV installers: solar modules, inverters, photovoltaic mounting systems, self-consumption systems, monitoring of the PV installation and accessories.

YG SOLAR ENGINEERING is represented by 14 companies in several countries and, depending on the project size, employs more than 150 people. The head office is in Germany.

YG SOLAR ENGINEERING attaches great importance to offering its customers and project partners sound advice and high product quality. Only high-quality components are included in the product range of the photovoltaic wholesaler. The portfolio includes solar modules from the following manufacturers: Axitec, LG, Luxor, Panasonic, REC, Suntech and many more. Brands for the areas of inverters, optimization, storage solutions and electromobility: ABB, AEConversion, Axitec, BYD, Delta, Enphase, Fronius, Kaco, Kostal, LG Chem, Mennekes, SMA, SolarEdge, Solax Power and many more. Mounting systems are supplied by IRFTS, K2 Systems, Mazari, Renusol, ZEP and many others. Thanks to effective logistics, the ordered goods reach their destination as quickly as possible.

All of this makes YG SOLAR ENGINEERING a professional partner for PV installers. For every customer and every project, from single-family homes to solar parks. The trained sales and technology team will be happy to answer all your questions about photovoltaics.

Get to know us and convince yourself that we are the right partner for you! Call us, write us an email or visit us in our office. We look forward to working with you.

WHO WE ARE

We are fully dedicated to energy. YG SOLAR ENGINEERING is focused on project development, engineering, and plant operation. With many years of activity in the field of engineering services and international project management, YG SOLAR offers quality German-engineered solutions and is your reliable partner for the successful implementation of global energy projects.

ABOUT OUR VISION

YG SOLAR is a leading company of large scale photovoltaic plants. We expect the highest quality from our products and suppliers in order to provide our customers with the best in engineering expertise. Quality is central to all our thoughts and actions.

Our vision is to make photovoltaic energy a reality.

Through its work, YG SOLAR ENGINEERING wants to pioneer the global economy and at the same time contribute to the world's clean energy needs by generating energy from sustainable, clean renewable energy sources such as the sun that does not pollute the world.

The idea of converting solar energy in a solar cell into usable energy using semiconductors has changed the world. Photovoltaics give us the opportunity to say goodbye to energy generation from the dwindling supply of fossil fuels. Get an experienced partner like YG SOLAR ENGINEERING at your side if you want to take the responsible step into the future with your company or your private household by switching to renewable energies and also want to save noticeably energy costs.

OUR TEAM

YG SOLAR's team members have been active in the renewable energy industry for over 10 years. We coordinate the design, engineering, procurement and construction of energy generating assets in many different countries and remote locations. We have a global network of partners to support customers

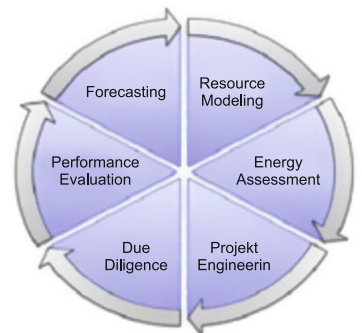

Our Partners :

OUR MISSION IS YOUR BENEFIT

The project business incorporates the planning and implementation of solar parks as well as comprehensive consulting services, which include funding and financing advice and monitoring of the facilities.

- ✓ Systematic project management
- ✓ High quality level
- ✓ Performance guarantees
- ✓ Continuous operation and maintenance

German Engineering Excellence

QUALITY AND CERTIFICATION

YG SOLAR ENGINEERING acts in order to make a difference in its sector by using sustainability and customer-oriented and high quality products in the application of new technologies.

From planning to the finished delivery of photovoltaic systems, YG SOLAR ENGINEERING and its specialist partners offer competent customer service. The focus is on the highest quality of the individual components, especially the solar modules.
